01 WHO ARE WE?

We are a team of experts whose focusing on creating high-quality brochures.

A highly effective brochure distinctly and succinctly details what your business is about and what you can do for your customers. On the other hand, a poorly designed brochure will only chase away potential buyers to the welcoming arms of your competitors.

Its time for you to transform the image of your company into a world class standard.

THE VALUE!

+500

OUR VISION IS TO...

Launch more than hundreds of high-quality brochure by 2018, putting our effort to offer the perfect templates to fulfill our customer's purposes

Think about this scenario: you attended a business trade show and met some influential people in your niche for the first time. During your brief meeting with someone, you try to learn more about each other's company, products or services. But what happens when you part ways?

A well-designed brochure will be a reminder to him, and to the other people you've met, of what your business is all about. Your brochure will tell them what sets you apart from your competitors.A powerful brochure can educate its readers, convey good credibility and authority to the company, increase the target audience, and persuade consumers to take action.

For many graphic designers, creating a quality brochure is a challenge.

02 Fonts download and installation

Before you open the template be sure that you have installed the font, you can download them from links written inside the included “fonts.txt” file.

How to Install Fonts (Windows):

Extract the files you have downloaded.
Under Windows 8/7/Vista
Select the font files (.ttf, .otf or .fon) then Right-click > Install
Under any version of Windows
Place the font files (.ttf, .otf or .fon) into the Fonts folder, usually C:\Windows\Fonts.

How to Install Fonts (MAC):

Under Mac OS X 10.3 or above (including the FontBook)
Double-click the font file > “Install font” button at the bottom of the preview.
Under any version of Mac OS X:
Put the files into /Library/Fonts (for all users), or into /Users/Your_username/Library/Fonts (for you only).
Under Mac OS 9 or earlier:
Drag the fonts suitcases into the System folder. The system will propose you to add them to the Fonts folder.

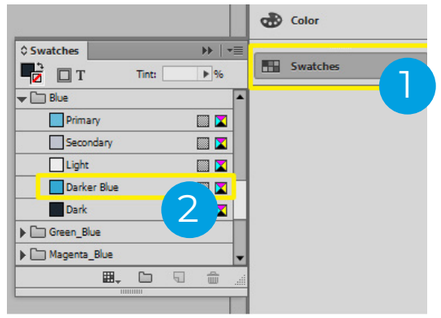
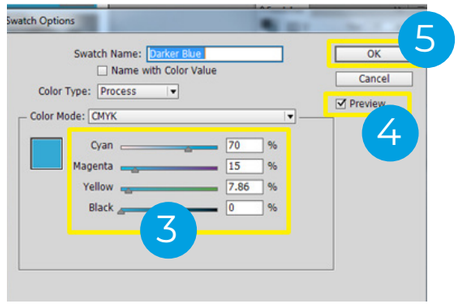
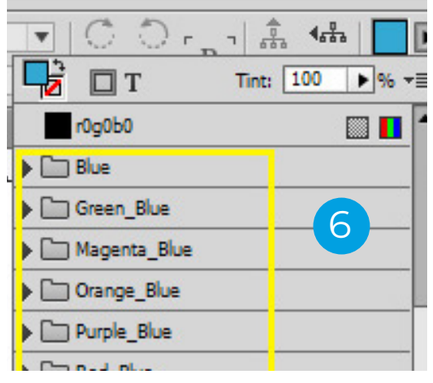
03 How to change document colors?

1. Select Swatches from the right panel.
2. Select the color you want to change from the Swatches.
3. A new window will appear “ Swatch Options “, Change the value of the color until you get the needed result.
4. You can check the “ Preview “ option to see the outcome before applying it.
5. Click Ok to save.
6. **Note :** Most of templates have a multi scheme colors folder, if you want to apply one of them to the current document, you need to delete the color you want to change and replace it with the other color from the other folders or you can get the CMYK value from the other Colors group and apply the above 5 steps.

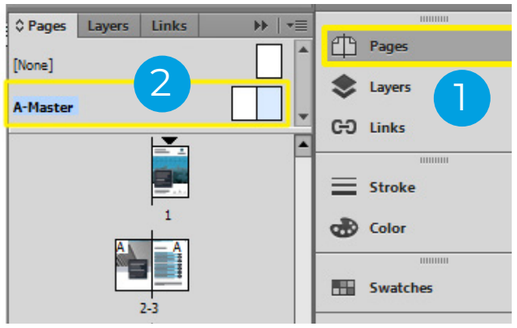


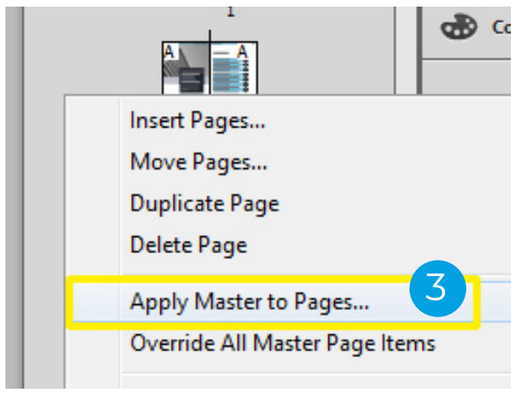


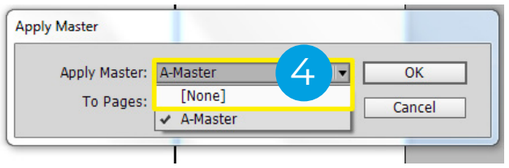


04 Editing header and footer contents

1. Go to Windws >> Pages or select the Pages from the right tools panel.
2. Double click on the Pages Symbol from A-Master, this will take you to the A- Master page, you can edit the header text, delete or add anything inside the Master Page, will apply to all pages who are linked with this Master Page.
3. if you want to unlinked pages from the A-Master Page, follow these steps : select the page you want to remove the A-Master page from it, right click the selected page, Choose Apply Master to Pages, a new dialog option will appear as in Image (3), choose [None], then Ok to apply.







05 How to place images?

1. Select the Placeholder (shape).
2. Go to File >> Place, a new dialog window will appear, choose the image you want to add, then click ok.
3. To fit image inside the holder, select the placeholder, got the top menu bar, choose this symbol as in Image (2).
